BY APPOINTMENT
A. S. WATSON & COMPANY
LIMITED.

ESTABLISHED A.D. 1841.

MANUFACTURERS OF AERATED
WATERS.ONE OF THE LEADING MANUFACTURERS OF AERATED
WATERS, employing the best Machinery, embodying
all the latest improvements in the trade.The greatest attention has been paid to
apparatus for ensuring purity in the Water
to secure which we have added a Con-
tainer capable of supplying us with 3,000 gallons
of distilled water a day, and are in a
position to compete in quality with the best
English Makers. Our Sweet Waters cannot be
surpassed.The purest ingredients only are used, and
the utmost care and cleanliness are exercised in
the manufacture throughout.

LARGE BOMBAY "SODAS".

We continue to supply large bottles at
a trifling extra charge to those of
our Customers who prefer to have their
water at home.COAST PORT ORDERS, whenever practicable, are despatched by first
steamer leaving after receipt of order.For Coast Ports, Waters are packed
and placed on board ship at Hongkong price,
and the full amount allowed for Packages and
Entails when received in good order.

Counterfull Orders Books supplied on application.

Our Registered Telegraphic Address is,
"DISPENSARY, HONG KONG." And all signed messages addressed thus
will receive prompt attention.The following is a List of Waters always
kept ready in Stock:—

PURE AERATED WATER.

SODA WATER.

LEMONADE.

POTASH WATER.

LITHIA WATER.

SARSPARILLA WATER.

TONIC WATER.

GINGEE ALE.

GINGEAD BEER.

No Credit given for Bottles that look dirty,
or greasy, or that appear to have been used
for any other purpose than that of containing
Aerated Water, as such Bottles are never used
again by us.A. S. WATSON & CO., LIMITED,
Hongkong, China, and Manila. [1890]

SIRTH.

On the 6th instant at Kowloon, the wife of H. E.
Dawson, of a daughter. [1890]

The Daily Press.

HONGKONG, FEBRUARY 7TH, 1890.

The public, especially the investing public,
is indebted to Mr. J. J. FRANCIS, Q.C., for
the very interesting lecture he gave on Wednesday afternoon on Borneo and its prospects. The learned gentleman has recently paid a visit to that land of promise, and while there took the opportunity of learning as much as possible of the country, its industries and its future prospects. The result of his investigations he placed before the public in his lecture, and the account he gave of the tobacco culture must have been cheering to many a holder of shares in planting Companies, will rest mainly on the production of tobacco, and it is his firm conviction that tobacco cultivation will be a success. That the land was good land he could see for himself, and that it was excellent land for tobacco growing he was told by everyone. Every essential is present, he says, to make the cultivation of tobacco a success, and extremely handsome dividends will be earned, provided there is good management and—here comes the rub—good luck. Several times during the course of the lecture the learned gentleman made use of the term "good luck" as one of the essentials of success. It would have conduced to a clearer understanding of his position had he explained what he meant by good luck. Is the success of tobacco cultivation in Borneo more largely dependent on chance than it is elsewhere? This is a suggestion which naturally arises from a perusal of Mr. FRANCIS's remarks, and it is, we believe, to some extent borne out by facts. Let not investors in tobacco estates be unduly alarmed, however. The necessary elements of success are present to such an extent in Borneo that even with bad luck we believe handsome dividends will be earned, though on an average of years they may not reach the handsome figure of fifty or sixty per cent predicted by Mr. FRANCIS. The element of uncertainty is in the rainfall. That the land is excellent there can be no doubt, and in good years very handsome returns will almost certainly be realized, but allowances must be made for years when the rainfall proves unfavourable. The ideal tobacco country is one where the rainfall shows little variation from month to month and year to year; in Borneo the variations are considerable, but not so considerable we believe, as to prevent tobacco cultivation being a very great success, though not quite so magnificent a success, perhaps, as to enable estates to yield returns of fifty or sixty per cent. In a good year they may and probably will do so, but to expect such a return continuously, we think, is unworkable. Investors, however, will probably be well content if when their dividends are spread over a term of years they average twenty per cent, and this can hardly be considered too much to look for, since Mr. FRANCIS was able to give an instance of one estate which on its first year's product paid 11½ per cent, and last year had tobacco in its godowns equivalent to a return of something like 55 per cent.

MODERATE drinkers must have been gratified to find that Dr. CANTRELL, in his recent lecture on food in the tropics, was so sound on the liquor question. To sit up late and drink whiskey was Dr. CANTRELL's advice only, as it is possible to have too much of a good thing, who would limit the quantity to one wine-glass full a day, well diluted, and taken in two doses. Beer and stout he does not recommend, considering them unsuitable to the climate. In England, of course it is different, and in the last papers received we find an "awful example" of a man dying for want of a glass of beer. Such at least seemed to be the Coroner's opinion of the cause of death. Dr. CHATRON, of Chester, held an inquest at Nantwich touching the death of

an aged inmate of the workhouse. The evidence showed that he ate a very heavy Christmas dinner, and next morning was found dead in bed. In reply to the coroner, the master of the workhouse stated that the guardians had passed a special resolution refusing beer or alcohol stimulants on Christmas Day. The coroner said "it was quite unnecessary to pursue the inquiry further. For reasons best known to the guardians they had departed from the usual arrangement of allowing beer at the Christmas dinner. His own impression was that, instead of doing harm, a little alcoholic stimulant was beneficial as assisting to put rid of a heavy meal. What were the good things of earth sent for unless to be enjoyed in moderation? Did they mean to tell him that a glass of wine or beer would hurt any living man? Certainly not. In fact stimulants, he knew from a very long experience, had been the means of saving thousands of lives. They were especially beneficial in cases of weak action of the heart. He remembered a case in Nantwich, where a man, a tobacconist, went home at night and ate an enormous supper. Next morning he was found dead in bed. The enormous quantity of food had filled the stomach pressed upon the heart, and presented an upward flow of blood. Because he (the coroner) expressed the opinion that a glass of beer would have saved his life he was severely criticized.

Everything is good in its place, including beer, but moderation is the key to happiness. Our Sweet Waters cannot be surpassed.

The purest ingredients only are used, and the utmost care and cleanliness are exercised in the manufacture throughout.

The greatest attention has been paid to appliances for ensuring purity in the Water supply, to secure which we have added a Container capable of supplying us with 3,000 gallons of distilled water a day, and are in a position to compete in quality with the best English Makers. The greatest attention has been

There is much joy at the Vatican in consequence of the recent news about Miss Kate Drago, the daughter of the well-known American millionaires who lately took the veil at the Convent of the Holy Father to devote her fortunes to founding schools, and whose special work it shall be to spread the Roman Catholic faith amongst the negroes of the United States.

A number of benefactors of their kind must be rich men, who are good enough to make games for other people. The French, who through their Academicians do descriptions and bulletins have discovered that they invented most English games, notably lawn-tennis and football. It is just as well to have the point settled, for the authorship of these games has often claimed for others. But good as it is of the French to have invented them for us, it would be better still if they showed us how to play them.

The much-talked-about Church of the Sacred Heart, which so prominent edifice on the hill of Montmartre, which has been a cause of erosion for these fifteen years, is nearly finished at last. Costing more than three-quarters of a million dollars, it is said to be the largest church ever built in Paris. The building of the ceremony of consecration will be performed. Large sums of money were received during the Paris Exhibition period in aid of the building, and for the daily number of visitors to the unfinished church averaged 3,500.

One of the latest anecdotes about the German Emperor, eponym of his economy in the matter of cost, is that he is now laying out his coat to his Imperial master. He suggested that it was almost time to replace it with a new one. Taking up the coat and examining it minutely, the Kaiser said:—"Now tell me how much would you be able to get for this coat?" "Five thousand, your Majesty," was the man's reply. "Taking up his new coat, the Emperor, taking out his purse, offered five thousand for you, and now I suppose you will have no objection to my continuing to wear the coat a little longer!"

Mrs. Malone Pomeroy, owner of the Pommery and Grano champagne, is now about sixty years old, and she still attains over her wine interests with the greatest care. Her delight is to spend her time in the great city of Reims—where she lives—in the company of great literati. It is worth a visit to Reims, where the Pommery cellars, they are half out of chalk and are like an underground city, with streets and squares, and contain people and animals. Once these cellars Madame Pomeroy has built a residence in this palace she never leaves. Madame Pomeroy spends her winters in the house at Reims, and in the summer she goes to her castle of Chigny, a magnificent place, designed by herself. Her daughter is the Duchesse de Polignac.

An American paper, the *Providence Journal*, tells the following story of two Bostonians, both literary people:—"The man had a sentimental fashion of constantly alluding to his wife, who, strangely enough, was seldom to be seen with him. In the end, however, circumstances became difficultly vexed, and he gave up his hobby. One evening he went to a dinner given by a literary lady of note, and his conversation turned upon religion. There were opinions of various sorts, but the whole tone of the talk was serious until this man broke in by saying, in a most sentimental fashion: 'My dear wife, who is my religion?' The company in general regarded the speaker with feelings of admiration and respect, and there was a moment of silence. 'Mr. G.' one of the ladies said, breaking the silence. 'I have understood that a religion to be true must be universal. Is your wife universal?'"

An inauspicious full of travellers were tolding up one of the long hills of the county Wiltshire. The driver testily said, "I'm seat in front, and you sit behind, the horses. The poor beast toiled along as steadily, but the mix "inside" was too busy during the conversation to notice how slowly the car progressed. Presently the driver opened the door at the rear of the car and slammed it to again. The "inside" started, but thought the driver was about to drive himself, the door was securely closed. And the fellow repeated the same action, the door again closed, and again it to again. The travellers turned around angrily, and asked why he disturbed them in that manner. "What?" whispered the fellow, "don't speak so loud—it'll overhear us!" "Who is she?" "The mare. Speak low." he continued, putting his hand over his nose and mouth. "She has the door shut in that way she thinks one of you is getting down to walk up the hill, and that rises her spirit!" The inauspicious took the hint.

I have referred (says the London *Figure*) to the various steps taken by the German Emperor to eliminate French influence from his country as far as possible. But, not content with insinuations of the French being eliminated from the programmes of the State trials and the menus of the State dinners, he has now resolved to induce the Empress to assist in his anti-Gallic campaign. At a brilliant two-o'clock dinner the Emperor and Empress at Potzdam, after his return from his last series of State visits, it was noticed with surprise that the Empress instead of the usual annual dress done up on the top of her head in the Parisian fashion had had it arranged & in Marguerite style, the two long plaits which we have learned to know so well since "Graud's" was first produced. What is more, by the Emperor's orders numerous photographs of the Empress with her hair arranged in this characteristically German style have been taken, and will, of course, be exhibited in the windows all over the Fatherland, with a view of making the "Marguerite" coiffure generally fashionable in Germany.

He matched the oft-told story of how one of his countrymen broke the news of a comrade's death to the bereaved wife by asking her if she knew Maloney was in, by another which I suspect he evolved out of his inner consciousness, and which was briefly as follows:—Put called at the house of his elder brother, having been warned by his comrade's wife that he was there, and to prepare the old man's mind for what was to come. "What's the old fellow's name?" "Maloney." "Ah, but I've heard that brother don't stand at all. 'Twas the pig." "The pig? His body? Because it wasn't th' pig, but the old cow that died." "Ah, so long will ye, Paddy McCune. Pheath's the day th' cow's life is over, on yon grass out thare. Th' old cow's life is over, on yon grass out thare." "Oh, know that well, Missus McCarthy, because that cow's calving time is near. And Marry, who's lyin' down at the front door? 'Tis the old cow, Ma. 'Ah, Paddy, but you're a droll fellow to be lyin' down like that. Ma. Moika did! Gi gauds! No, no such look!"
